**DETAILED ACTION**

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 30, 31 and 36-47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jenkins (US-841) or Galleguillos et al. (US-768).

Claims 30, 31, 36-39 and 41-47 are rejected under Res Judicata as the rejection of these claims was affirmed by the Board.

Claim 40 is rejected insofar as the requirement for polymerization to be done in the presence of "a component g) which is selected from the group consisting of

g1) polyether-containing compounds,

g2) polymers which have at least 50% by weight of repeat units which are derived from vinyl alcohol,

g3) cellulose, starch and derivatives thereof,

and mixtures thereof" is fully met by the reference to Galleguillos et al, as seen in column 13, and rendered

prima facie obvious to one of ordinary skill in the art by the examples of Jenkins et al, which include surfactants. The required "g" compounds are known additives for emulsion polymerization as seen in Galleguillos et al. Both references render the claim prima facie obvious to one of ordinary skill in the art.
